System Architecture Block Diagram

Digital Zone Mapping | Roadside Radar-UWB Sensing | Connected Vehicle Control

V-ORRA | Intelligent Vehicle Signalling & Connected Road Safety System | VK26-IITH-SC-0177 | Vishwakarma Awards 2026-27

ITM University Gwalior | 27 October 2026 preparation

CONTROL PRINCIPLES | Ambiguous position / identity: no new restriction. | Expired horn authorization: release suppression.

Uncertain lighting: no automatic HIGH. | Physical override has priority. | Auxiliary demo only; closed-course only.
Independent demo supplies; local grounds only; no pole-to-vehicle cable or wiring into real vehicle horn / headlamp circuits.

LINE CONVENTIONS | Arrow direction indicates sender to receiver; matching named power nets are continuous locally.

Wired / logical data | Wireless RF | Power / voltage | Configuration | Inhibit / output control

M Mechanical structure | A Actuation & power | E Electronic controllers | F Firmware & logic | Dashed box: optional feature
